PROJECTS

Portfolio Website
- Responsive Personal Portfolio website built using HTML, CSS, and JavaScript
- Smooth scrolling in each section
- Includes light mode and dark mode
- List of all projects I have created

Calculator
- Simple calculator built using HTML, CSS, and JavaScript
- It uses basic operations like addition, subtraction, division, and multiplication
- Supports decimal values

Tip Calculator
- Website built using HTML, CSS, and JavaScript
- Enter the total bill amount and will add the tip and total together based on the tip percentage
- Tip percentage is between 0 and 100 percent
- Calculates the total amount of money each person gives for the bill and the tip amounts

Temperature Converter
- Website built using HTML, CSS, and JavaScript
- Enter any temperature you want in the Kelvin, Celsius, or Fahrenheit section
- Will convert the temperature you entered into the other two temperature measurments

Car Website
- Website built using HTML, CSS, and JavaScript
- It has a description of the Acura TLX car
- Can change the color of the car to see which you would prefer more
